Paper 6 (Calculator)

Higher Tier

Tuesday 9 November 2004 – Morning
Time: 2 hours

Materials required for examination

Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser, calculator.
 Tracing paper may be used.

Items included with question papers

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer **ALL** the questions in the spaces provided in this question paper.

You must NOT write on the formulae page or any blank pages. Anything you write on these pages will gain NO credit.

If you need more space to complete your answer to any question, use additional answer sheets.

Information for Candidates

The total mark for this paper is 100. This paper has 22 questions. There are 3 blank pages.

The marks for individual questions and parts of questions are shown in round brackets: e.g. (2).

Calculators may be used.

If your calculator does not have a π button, take the value of π to be 3,142 unless the question instructs otherwise.

Advice to Candidates

Show all stages in any calculations.

Work steadily through the paper. Do not spend too long on one question.

If you cannot answer a question, leave it and attempt the next one.

Return at the end to those you have left out.

Answer ALL TWENTY TWO questions.

Write your answers in the spaces provided.

You must write down all stages in your working.

1.

	Number of girls	Number of boys
Year 10	108	132
Year 11	90	110

The table gives information about Year 10 and Year 11 at Mathstown School.

Mathstown School had an end of term party.

40% of the students in Year 10 and 70% of the students in Year 11 went to the party.

Work out the percentage of all students in Years 10 and 11 who went to the party.

2. Pablo is an artist.

The scatter graph, opposite, gives information about the area and the cost of some of his pictures.

The line of best fit has been drawn on the graph.

All Pablo's pictures are rectangles.

One of his pictures costs £1000.

Its length is 48 cm.

Use the line of best fit to estimate the width of the picture.

3. The equation $x^3 + 4x = 100$

has one solution which is a positive number.

Use the method of trial and improvement to find this solution.

Give your answer correct to 1 decimal place.

You must show **ALL** your working.
